AircraftEngineers.co.uk specializes in Permanent and Contract Recruitment to the Aerospace Maintenance Sector. We have unparalleled expertise in this area, providing the most cost effective method of recruitment for businesses looking for manpower solutions. Our database of quality aircraft engineers allows us to network across the maintenance field for the best engineers to suit your business.

AircraftEngineers.co.uk is a specialist technical recruitment consultancy providing recruitment services to global aviation organisations.

Whether providing a single expert to support a short-term contract or permanent vacancy, to a fully managed team of professionals for a project roll out, we will locate, recruit and deliver the specialist resource solution to meet our clients' requirements.

MAINTENANCE

AircraftEngineers.co.uk offers experts in:

- first and second line turnaround,
- avionics,
- ground testing,
- airframe specialists,
- electrical,
- engine overhaul,
- inspection

and all disciplines which are necessary to keep today's modern aircraft fleet operational. From mechanics to JAR-66 licensed engineers, we have the answer.

DESIGN

We offer experts in the areas of:

- stress analysis,
- fatigue and fracture,
- weights,
- CAD,

and design, planning and technical publications.

We have a comprehensive database of qualified personnel who are experienced in all aspects of the Production / Assembly, Maintenance, Engineering, Design and Development sectors of the Aerospace industry.
